

AHEC CAREER ENHANCEMENT SCHOLARS (ACES)

Join students from high schools throughout Northwest Missouri in the ACES program to help you prepare for a career in healthcare.

Program includes:

- Interactive workshops, including dissection labs and clinical skill building workshops.
- Introduction to HIPAA, professionalism, health literacy, public health, healthcare ethics, vital signs, infection control
- CPR and First Aid Training
- Online modules on Healthcare Foundations
- ACT Prep through The Princeton Review
- Visits to medical, dental, and nursing schools
- Job shadowing and volunteering
- Individual career planning
- Projects in your community
- Admissions information
- And more...

Informational sessions can be held online to discuss program requirements in detail. Please contact Savana Luft if interested.

“If you jump right into everything the AHEC ACES program has to offer, you’ll find it’s incredibly simple to see things come full circle. Eight years ago, I made the decision to become an ACES student and now I can see myself as the medical student who helped me during my ACES dissection workshop or doing my clinical rotations in the same clinics I’ve shadowed in through AHEC. Everything about the program builds on top of itself- you can definitely see how what you are doing now will get you to where you want to be in the future!”

Rebecca Ernst, ACES, Bryant Scholar, MU School of Medicine

*“Come join me and discover so many opportunities with AHEC!”
